

## CHO-GFP Stable Cell Line

Catalog Number	Name	Amount
<a href="#">SC039-Puro</a>	CHO-GFP stable cells (Puromycin)	1 vial of cells (2 x 10 <sup>6</sup> cells) in 80% F12 medium, 10% FBS, 10% DMSO.
<a href="#">SC039-Bsd</a>	CHO-GFP stable cells (Blasticidin)	
<a href="#">SC039-RFP</a>	CHO-RFP stable cells (Puromycin)	

### Storage:

Upon received, place vial in Liquid Nitrogen for long-term storage, or saved in -80oC for short-time storage up to 1 week.

## 1. Product Description

The CHO-K1 cell line was an adherent epithelial cells derived from an ovary of an adult Chinese hamster. It is often used in biological and medical research and commercially in the production of therapeutic proteins. They are grown as a cultured monolayer and require the amino acid proline in their culture medium due to the absence of the gene for proline synthesis.

GenTarget's those Stable Cell Lines are transformed from the CHO-K1 cell line, stably expressing the humanized **GFP** or **RFP** fluorescent marker. It was established by transduction of the enhanced GFP or RFP expression lentivirus containing a Puromycin or blasticidin resistance marker for selection. The Fluorescent reporter is constitutively expressed at a high-level under the enhanced CMV promoter (suCMV). The following expression construct was integrated into the cell line's genome.

Strong Green fluorescent signal can be visualized in every single cell under fluorescent microscope (GFP filter set: Ex ~490nm / Em ~510nm)

## 2. Culture procedures

- 1) Thaw the frozen vial of cells quickly in a 37 °C water bath (1-3min), Decontaminate the outside of the vial with 70% ethanol.
- 2) Transfer the entire contents of the cryovial into a T-75 cm<sup>2</sup> flask containing 15 ml of pre-warmed complete medium. Incubate the cells overnight in a 37 °C incubator, 5% CO<sub>2</sub>.
- 3) The following day, replace the medium with 15 ml of prewarmed, complete medium, of select the transduced cells by antibiotic containing medium (dependent upon cell selection marker, add 20 µg/ml final Puromycin or of 10 ug/ml of final Blasticidin in medium).
- 4) Incubate the cells and monitor cell density.
- 5) Detach cells via EDTA /trypsin (0.05%), Pass cells (1:5 dilution) when the culture reaches 80-90% confluence.
- 6) Freeze cells at a density of 3 x 10<sup>6</sup> cells/ml using 90% complete medium with 10% DMSO.

### 3. Complete medium

- F12 /DMEM medium
- 2mM L-glutamine
- 10% Fetal Bovine Serum (FBS)
- 1% Pen-strep

### 4. Quality Control

Each vial contains greater than 2 x 10<sup>6</sup> cells with >95% viability before freezing. Cells are validated as free of bacteria, viruses, and mycoplasma.

### 5. Warranty and user terms

- 1) This product is warranted to perform as described when used in accordance with this manual. GenTarget, Inc. MAKES NO REPRESENTATIONS AND EXTENDS NO WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED. GenTarget's sole remedy for breach of warranty should be, at the option of GenTarget, to repair or replace the product if this product does not meet the stated quality standard.
- 2) By paying the purchase price, the buyer is granted a non-transferable, non-exclusive license to use the product. This product is sold **for research and development purposes only**.
- 3) This product is limited to the laboratory that the product is delivered to. This Product is not for resale, distribution, or transfer for any purpose, including transfer of the Product as a component of any products. GenTarget will retain all rights for this Product's license and other intellectual property.

- 4) This Product should be used only for non-profit purposes, including any products and services usages. Furthermore, **research use only** means that this product is excluded, without limitation, from resale, repackaging, or modification for the purpose of making or selling of any commercial products or services without the written approval of GenTarget. You may contact our Business Development department at [support@gentarget.com](mailto:support@gentarget.com) for product proprietary information.
- 5) GenTarget is not liable, and does not have any responsibility or liability, whatsoever for any direct and indirect, consequential, or other damages resulting from using this Product.

6. **Attachment:** GenTarget' s pre-made stable cell line list:

<b>Catalog #</b>	<b>Product Name</b>
<a href="#">SC001</a>	HEK293-GFP stable cells
