

## Human ES2 / TetR (Puro) Stable Cells

| Catalog Number             | Product name                         | Amount                                 |
|----------------------------|--------------------------------------|----------------------------------------|
| <a href="#">SC066-TetR</a> | Human ES2 / TetR (Puro) Stable Cells | 1 ml / vial<br>(in cell frozen medium) |

### Storage:

Upon received, place vial in Liquid Nitrogen for long-term storage, or saved in -80oC for short-time storage up to 1 week.

### 1. Product Description

Human ES2 cell line was human ovarian clear cell carcinoma, established from a from a 47 year old black woman. ES-2 cells express low levels of P glycoprotein.

This [tetracycline repressor](#) (TetR) expression stable cell line was transformed from ES2 cells, stably expressing TetR gene. It is established by transduction of TetR expression lentivirus. TetR is constitutively expressed in high-level under [suCMV promoter](#). The Puromycin (Puro) selection marker was constitutively expressed under RSV promoter.

The premade stable TetR cell line can be used to generate a target inducible expression cell line by simply infect with GenTarget's [inducible target expression lentivirus](#).

The follow scheme demonstrates the core structure of the expression cassette that integrated in the cell line's genome.

### Core expression cassette:

## 2. Culture procedures

- 1) Thaw the frozen vial of cells quickly in a 37°C water bath (1~3min), decontaminate the outside of the vial with 75% ethanol.
- 2) Transfer the entire contents of the cryovial into a T-75 cm<sup>2</sup> flask containing 20 ml of pre-warmed complete medium. Incubate the cells overnight in a 37°C incubator, 5% CO<sub>2</sub>.
- 3) The following day, replace the medium with 20 ml of prewarmed, complete medium.
- 4) Incubate the cells and monitor cell density.
- 5) Pass cells (1:3 to 1:10 dilution) when the culture reaches 70% confluent. At 70% confluence, cells tend to detach in small clumps that float in the media.
- 6) Freeze cells at a density of  $\sim 3 \times 10^6$  cells/ml using 90% complete medium with 10% DMSO.

## 3. Complete medium

McCoy's 5A  
10% FBS  
2 mM Glutamine  
0.1% sodium pyruvate  
1x Antibiotic-Antimycotic (or 1x Penicillin/Streptomycin)

Optional to add: final **0.5 ug/ml** of Puromycin (Note: do not add puromycin at 1st thaw culture. This final Puromycin concentration is also depend on the potency of puromycin)

## 4. Quality Control

Each vial contains  $\sim 2 \times 10^6$  cells with >95% viability before freezing. Cells are verified to be free of bacteria, viruses, and mycoplasma.

## 5. Warranty and user terms

- 1) This product is warranted to perform as described when used in accordance with this manual. GenTarget, Inc. MAKES NO REPRESENTATIONS AND EXTENDS NO WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED. GenTarget's sole remedy for breach of warranty should be, at the option of GenTarget, to repair or replace the product if this product does not meet the stated quality standard.
- 2) By paying the purchase price, the buyer is granted a non-transferable, non-exclusive license to use the product. This product is sold **for research and development purposes only**.

- 3) This product is limited to the laboratory that the product is delivered to. This Product is not for resale, distribution, or transfer for any purpose, including transfer of the Product as a component of any products. GenTarget will retain all rights for this Product's license and other intellectual property.
- 4) This Product should be used only for non-profit purposes, including any products and services usages. Furthermore, **research use only** means that this product is excluded, without limitation, from resale, repackaging, or modification for the purpose of making or selling of any commercial products or services without the written approval of GenTarget. You may contact our Business Development department at [support@gentarget.com](mailto:support@gentarget.com) for product proprietary information.
- 5) GenTarget is not liable, and does not have any responsibility or liability, whatsoever for any direct and indirect, consequential, or other damages resulting from using this Product.
- 6) Gentarget **do not** provide the protected reporter's sequences information for all our cell line products unless a license was purchased.
