

## Renilla Luciferase / Hela Stable Cell Line

Catalog Number	Product name	Amount
<a href="#">SC093</a>	<b>Renilla</b> Luciferase / <b>Hela</b> Stable Cell Line	1 ml / vial (2 million cells)

### Storage:

Upon received, place vial in Liquid Nitrogen for long-term storage, or saved in -80oC for short-time storage up to 1 week.

### 1. Product Description

HeLa cell line is an immortal cell line derived from cervical cancer cells taken from a female patient, Henrietta Lacks, in year 1951. The cell line was found to be remarkably durable and prolific. It is the oldest and most commonly used human cell line in all kinds of biomedical research, such as studying the effects of diseases or developing medications and vaccines, and play an invaluable role in medicine.

**This Renilla Luciferase expression cell line** is transformed from the Hela host cell line, stably expresses the [Renilla luciferase gene](#).

The Renilla luciferase is constitutively expressed under the enhanced EF1a promoter, and carrying the Puromycin selection under the Rsv promoter. The following expression cassette was inserted into cell's genome

Renilla luciferase signal can be detected via its substrate (coelenterazine) in luciferase assay (No need ATP).

### 2. Culture procedures

- 1) Thaw the frozen vial of cells quickly in a 37°C water bath (1~3min), decontaminate the outside of the vial with 70% ethanol.
- 2) Transfer the entire contents of the cryovial into a T-75 cm<sup>2</sup> flask containing 20 ml of pre-warmed complete medium. Incubate the cells overnight in a 37°C incubator, 5% CO<sub>2</sub>.

- 3) On the following day, replace the medium with 20 ml of prewarmed, complete medium.
- 4) Incubate the cells and monitor cell density.
- 5) Pass cells (1:5 to 1:10 dilution) using 0.25% Trypsin-EDTA solution when the culture reaches ~90% confluent.
- 6) Freeze cells at a density of  $\sim 3 \times 10^6$  cells/ml using 90% complete medium with 10% DMSO.

### 3. Complete medium

MEM (high glucose)  
2mM L-glutamine  
10% Fetal Bovine Serum (FBS)  
0.1 mM MEM Non-Essential Amino Acids (NEAA)  
1% Pen-strep / Antibiotic-antimycoplasma

- Optional to add: final **0.5 ug/ml** of Puromycin and **5 ug/ml** of Blasticidin (Note: do not add antibiotic at 1st time thaw culture. This final concentration is also depend on the potency of antibiotic's brand)

### 4. Quality Control

Each vial contains  $\sim 2 \times 10^6$  cells with >95% viability before freezing. Cells are verified to be free of bacteria, viruses, and mycoplasma.

### 5. Warranty and user terms

- 1) This product is warranted to perform as described when used in accordance with this manual. GenTarget's sole remedy for breach of warranty should be, at the option of GenTarget, to repair or replace the product if this product does not meet the stated quality standard.
- 2) By paying the purchase price, the buyer is granted a non-transferable, non-exclusive license to use the product. This product is sold **for research and development purposes only**. For commercial use, please contact GenTarget Inc for license.
- 3) This product is limited to the laboratory that the product is delivered to. This Product is not for resale, distribution, or transfer for any purpose, including transfer of the Product as a component of any product(s); GenTarget will retain all rights for this Product's license and other intellectual property.
- 4) This Product should be used only for non-profit purposes including any products and services usages; furthermore, **research use only** means that this product is excluded, without limitation, from resale, repackaging, or modification for the making or selling of any commercial product(s) or

service(s) without the written approval of GenTarget. You may contact our Business Development department at [support@gentarget.com](mailto:support@gentarget.com) for product proprietary information.

5) GenTarget is not liable, and does not have any responsibility or liability, whatsoever for any direct and indirect, consequential, or other damages resulting from using this Product.

6. **Attachment:** GenTarget' s pre-made stable cell line list:

<b>Catalog #</b>	<b>Product Name</b>
<a href="#">SC001</a>	HEK293-GFP stable cells
<a href="#">SC002-Bsd</a>	luciferase (firefly), HEK293 stable cells (Blasticidin)
<a href="#">SC002-GB</a>	luciferase (firefly), HEK293 stable cells (GFP-Blasticidin)
<a href="#">SC002-GP</a>	luciferase (firefly), HEK293 stable cells (GFP-Puromycin)
<a href="#">SC002-Neo</a>	luciferase (firefly), HEK293 stable cells (Neomycin)
<a href="#">SC002-Puro</a>	luciferase (firefly), HEK293 stable cells (Puromycin)
<a href="#">SC002-RB</a>	luciferase (firefly), HEK293 stable cells (RFP, Blasticidin)
<a href="#">SC002-RP</a>	luciferase (firefly), HEK293 stable cells (RFP-Puromycin)
<a href="#">SC002T-RP</a>	HEK293T / Luciferase stable cells (RFP-Puromycin)
<a href="#">SC003</a>	LacZ (6His, RFP) / HEK293 Expression stable cell line
<a href="#">SC004-Bsd</a>	CRE Expression / HEK293 Cell Line (Bsd)
<a href="#">SC004-GP</a>	CRE Expression / HEK293 Cell Line (GFP, Puro)
<a href="#">SC004-Neo</a>	CRE Expression / HEK293 Cell Line (Neo)
<a href="#">SC004-Puro</a>	CRE Expression / HEK293 Cell Line (Puro)
<a href="#">SC004-RB</a>	CRE Expression / HEK293 Cell Line (RFP, Bsd)
<a href="#">SC004-RP</a>	CRE Expression / HEK293 Cell Line (RFP, Puro)
<a href="#">SC005-Bsd</a>	HEK293-TetR (Bsd)
<a href="#">SC005-GB</a>	HEK293-TetR (GFP-Bsd)

<b>Catalog #</b>	<b>Product Name</b>
<a href="#">SC005-Hygro</a>	HEK293-TetR (Hygro)
<a href="#">SC005-Neo</a>	HEK293-TetR (Neo)
